State Board, St Xaviers High School 2018 | Belagavi
Percentage: 89.93

Skills

Python • C programming • Java • C++ • MySql • Dbms • Operating System • Data Structures • html

Courses

Python basics and advance, Fundamentals Chikkamagaluru
In the Python Basics course, I gained a solid understanding of fundamental programming concepts such as variables, data types, loops, and functions. I also learned how to write clean and efficient code, as well as how to approach and solve problems using Python.

In the Python Advanced course, I expanded my knowledge by diving into more complex topics such as object-oriented programming, modules, and libraries.

SQL-The Complete Introduction to SQL programming, Udemy
In this course, I learned how to properly create various database and perform various manipulations with data using SQL.

The Cyber Security Bootcamp, Udemy
In this course, learned the basics of cyber security and ethical hacking and basics of how to launch dns attacking.

Organizations

Capulus Technologies Pvt Ltd, Intern present | Chikkamagaluru
Capulus Technologies is the partner of choice for many of the enterprises, SMEs and Government Departments. We help businesses elevate their value through our products which has applications spread across various sectors. I as an intern learned about data annotation and had a hands on experience on data annotation.

Projects

Flip It Memory Game

Flip It game is built using Android Studio. The game allows the users to select cards and match them and test them for their memory.

Online Art Gallery

The online art gallery built with PHP is a dynamic and visually appealing platform that showcases a diverse collection of artwork from talented artists. Using PHP, the gallery offers a seamless user experience, allowing visitors to browse, search, and explore various artwork.

Fishing Occupation Simulation

Fishing occupation simulation built using OpenGL functions with the help of Codeblocks software..
